

## Payment Processing and Networking Services

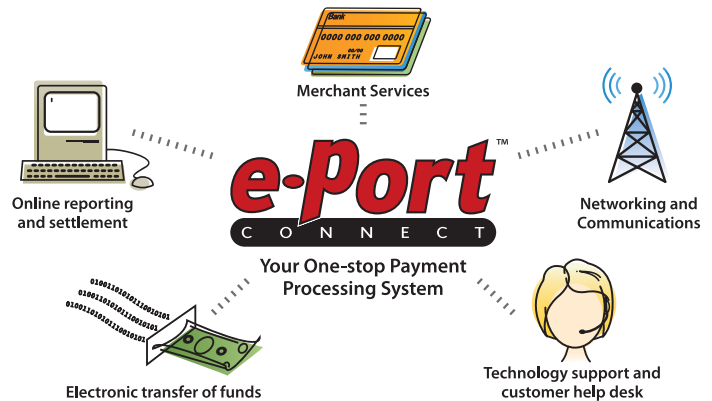

### Energize Sales and Increase customer satisfaction with ePort Connect™

#### One Stop Payment Processing

ePort Connect™ is complete suite of payment services specially tailored to fit the needs of the self-service point-of-sale industries. ePort Connect enables self-service terminals, such as vending machines and kiosks, to accept credit, debit, new contactless cards and other cashless forms of payment, handles all elements of transaction processing, and allows customers to monitor and manage their terminals online. Truly making one-stop payment processing a reality.

#### Your ePort Connect service package includes:

- **Merchant services.** eliminates the need for you to establish a merchant account for each credit-card enabled terminal. As part of this service, we will process your transactions on your behalf while minimizing and handling charge backs and returns.
- **Networking and communication services.** Customers can select the ePort® card reader hardware or software from USA Technologies as their preferred hardware component or elect to use a credit/debit combo reader manufactured by MEI and Coinco. These options can communicate to USA Technologies' back-end system wirelessly or via an Ethernet or standard POTS phone line, and receive all of the service benefits available through ePort Connect.
- **Technical support.** Our highly experienced technicians are on call 24/7 to handle any technical inquiries.
- **A help desk for your customers' inquires.** USA Technologies' toll-free phone number is listed on a consumers' credit card statement with each purchase made through the ePort Connect payment processing system. If they have questions regarding these transactions, our help-desk representatives are available to assist them.
- **EFTs.** Funds from the credit and debit card transactions are electronically transferred into your bank account on a customizable pre-scheduled basis.

- **Online reporting and management.** The most unique and powerful component of the ePort Connect service package is the online reporting and management service, USALive®. USALive is designed to provide you with both cash and credit sales information and pre-defined alerts in customizable reports so you can more effectively manage and monitor your terminals in the field.
- **Settlement.** Vending operators who use ePort Connect can now settle their cashless vending accounts in a way that is fast and easy and able to interface with their existing accounting systems. DEX data transfer is also an available option.
